

## **1.9 Field of activity planned by organisation.**

### Class.

Elements other than complete engine and APUs.

### Category.

- C1 Air conditioning and pressurisation
- C4 Doors and Panels
- C6 Fittings
- C7 Engine – APU
- C8 Flight commands
- C9 Fuel – Cells
- C14 Landing gear
- C17 Air bleeding
- C18 Protection against frost / rain / fire
- C19 Windows
- C20 Structure :

Mechanical parts.

### Associated limitations.

- C19: Limitation exclude window maintenance operations, for which all repairs and tests are carried out by a Part-145 approved organisation with provision of EASA Form 1.

### Capability List.

The element references for aircraft covered by the approval are included in the Part 145 Capability List generated by our GPAO/GQAO and overseen by our quality department. This list is changed by delegation, according to the "aircraft element maintenance" procedure.

The Capability List is included in the document "Capability List".

### Manufacture of elementary components.

Manufacture of elementary components such as rings, rods and wedges is authorised when the maintenance manual refers to it, provided the manufacturing, inspection and installation data and the tests are sufficient and the parts are within the scope of Gentilin's know-how.
